Summary

Motivated student eager to apply classroom Knowledge to real-world experiences, with a strong willingness to learn and contribute. Effective communicator with a collaborative mindset, ready to bring fresh perspectives and a strong work ethic to any team

Experience

1] Web Development using React.js - Kolhapur, Maharashtra (Company-iGap)

2] Full Stack Development - Kolhapur, Maharashtra (company-Platominds)

Description: Here, I learned web development technology and basic database skills with java, spring, springboot and hibernate.

Education

Dr.J.J.Magdum College Of Engineering, Jaysingpur
University of Kolhapur, Maharashtra
Computer Science| Bachelor in computer science and engineering CGPA: 8.70.

Institute of Civil And Rural Engineering, Gargoti,
Kolhapur, Maharashtra
CGPA: 82.00.

Maharashtra state board Kolhapur, Maharashtra S.S.C
GPA: 91.00

Skills

- C, C++ - Hands-on experience through coursework and problem-solving.
- Java - Worked on backend projects using frameworks like Spring Boot.
- HTML, CSS, Bootstrap - Built responsive layouts and web pages.
- React.js - Developed single-page applications during internships.
- Spring, Hibernate - Gained experience implementing REST APIs and database operations.
- MySQL, SQL - Worked with databases for query optimization and data management.
- Data Structures & Algorithms (DSA) - Gained hands-on experience by implementing algorithms and solving problems

Certification

1. Python Mastery with Generative AI Certificate.
2. Statement of Marks-cum Certificate.

Projects

1] Government Hospital Management System

The Government Hospital Management System is an effective solution to improve efficiency, transparency, and service quality in public healthcare institutions. It will significantly benefit both hospital staff and patients by digitizing and simplifying complex workflows.

2] Jewelry Website

Developed the front-end of an online matrimonial platform deployed on XAMPP. Utilized HTML, CSS, and PHP to create user profile pages and key UI components. Contributed to the implementation of user registration, profile creation, and search functionalities. Collaborated with a team to integrate front-end design with back-end logic (PHP and SQL).
